

Launching of School Health initiative at District Umerkot, Sindh.....[read more](#)

NCHD in collaboration with UNESCO has started a project on Advocacy and Capacity Building under “School Health Program”. An important element of this program is “School Health Education”, which was launched in Umerkot on 12 October 2010.

Under this initiative, the head teachers of all schools of Taulka Umerkot would be trained to conduct health education of the school children. In this connection, a three-day workshop for the Master Trainers was conducted. To provide required impetus to the training, DCO Umerkot Mr. Ghulam Akber Laghari attended a training session and highlighted the importance of such trainings.

For teachers’ guidance, “School Health Education Guidebook” and “health education posters” were developed in Sindhi language for all schools of Taulka Umerkot.
